## SUMMARY

An adaptable professional with work experience in React JS, Angular , Node js and quality assurance. Detailed in problem-solving, workflow prioritization and creative thinking skills, strong Interpersonal and communication skills. I am a fast learner, aiming to leverage my abilities to successfully fill in for a software Engineering role at your company. I can be relied upon to help your company achieve its goals.

## EXPERIENCE

---

**Quality Assurance /Software Engineer** (Outsourced)

**March 2023 - Present**

Uridium Technologies (**Employer**)

Stanbic Financial Services Limited /Zest payment service (second organization)

- Developed and maintained web Application using angular and typescript.
- Collaborated with backend developers to implement RESTFUL API's and integrate with the frontend, to improve user experience.
- Implemented Angular Material components to create a consistent and visual appealing ui.
- Developed and executed comprehensive manual test plans for a **Zest payment gateway**, resulting in a reduction in defect rate and a increase in customer satisfaction. Collaborated closely with the development team to identify and resolve issues, and leveraged automated testing tools to streamline the testing process.
- Developed and executed comprehensive manual test plans both for **Market Place and store front**, resulting in a reduction in defect rate and a increase in customer satisfaction.

- Conducted regular reviews of test cases and test results, identifying areas for improvement and implementing changes to increase testing efficiency and effectiveness.
- Led the development and implementation of a new test automation framework, resulting in a 30% reduction in testing time and improved coverage of critical functionality. Designed and coded automated tests using Selenium and Java.
- Collaborated closely with product managers and UX designers to ensure that testing aligned with user needs and product requirements, contributing to the successful launch of multiple product releases.

## **Software Engineer**

**January 2022 - February 2023**

Upperlink limited

### **Responsibilities**

- Write codes for website and application development, while implementing standard procedures from production to deployment.
